

Compliments Key to More Joy, More Romance, Happier Families and Career Success

In our hurried lives, stressed relationships and growing culture of callousness, we overlook a simple yet powerful strategy to increase well-being and health, squash household squabbles, rekindle our romance and grow career success, according to the new book, *The Compliment Quotient*.

Brimming with humor and practical advice, author **Monica Strobel** reveals **the hidden powers in appreciation** and offers lively **tips to use compliments** to overcome the irritations, overwhelm and bickering that zap our joy, jeopardize our health and threaten our relationships.

While many books address solving the **ever-elusive “get happy”** mystery, few provide this **realistic guidance** that **enhances the lives of others**, too. It's the answer to 'what can one person do' to make a positive difference.
